

Galilean Loupes

Production

Step 1: Assembly File

• Locate the Assembly file for the frame you need, then open it.

		and an and a start of the				

Step 2: Working Distance/IPD

- Right Click on the Ocular right, then "Edit Sketch"
- Enter in the WD at the top in MM
- Enter in the IPD of one side, plus .5mm.
 - A 60 IPD, would mean 30 on each side. Enter the right IPD as 30.5. The same for the left.

Step 3: Post, do note save

- We want to keep the assembly file the same for the standards. PLEASE DO NOT SAVE CHANGES
- Once complete, you only need to generate and Post the Process to the Machine Folder
 - See 3D Measuring on how to post and generate toolpath

• Save the File as the "WD" + "IPD" + "Declination Angle" + "Frame". 21 58 45 Infiniti

Example of File system

• Once you have the customers IPD and Working Distance, you may only need to verify it is in the machine folder! You do not need to create a new file every time!
